

The **sourcing platform** for **on-demand** manufacturing.

Thomas Bentzen - CEO | +47 920 20 256 | thomas@locat3d.no

Manufacturers today lack the resources to adapt to supply chain disruptions, leading to financial instability and risk.

Without access to the right competency, network, and insights, disruptions in the supply chain can delay or halt production, create high replacement costs, and cause lost revenue.

Our platform enables fast access to custom parts and turns idle capacity into revenue.

We automate the hard parts of manufacturing sourcing - supplier matching and contracts, design revisions and approval, post-processing and quality control, and financing and logistics.

TAM
€76B
Global market for
capacity sharing

SAM
€38B
Europe and
North America

SOM
€157M
Mechanical Industry
Captured by 2030

Our target - **mechanical
manufacturing in Europe
and North America.**

We offer a **supplier subscription model**, with an average monthly fee of €60 per capacity.

We project **€157M** in **ARR** by 2030.

Traction / Achievements

Approved application for Dual-Use Accelerator – Started on March 17

Collaboration with Norsk Titanium - A leader in aerospace-grade titanium AM

Signed a €40K leasing and IPR development agreement for OEMs

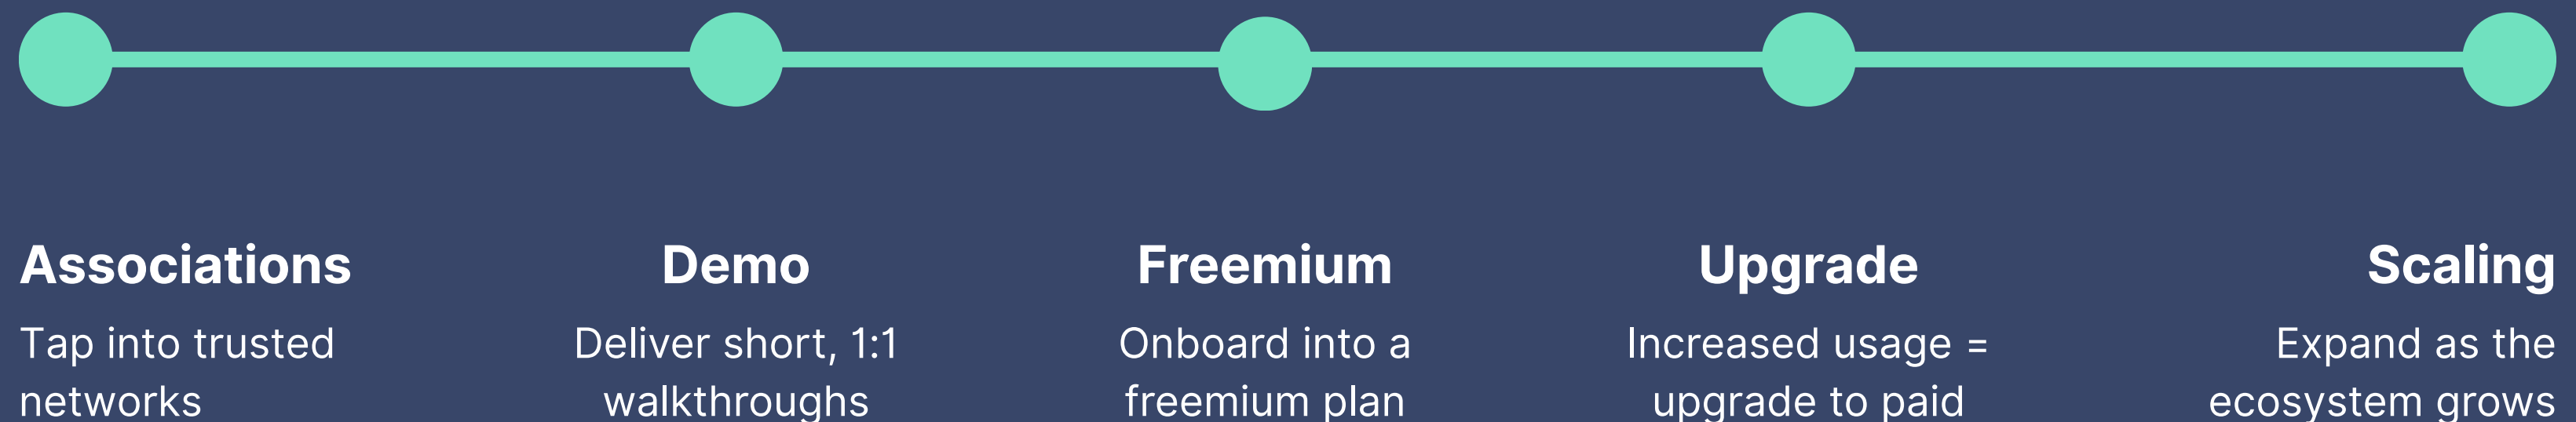

Approved SkatteFUNN – Cost framework of €1.7M for 2025–2026

International investors with a strong software track record

Innovation Norway – Advanced to Phase 3 grant-based funding

Targeting **SMBs in Northern Europe** through direct outreach to drive early growth.

Small dual-role manufacturers have accessible decision makers, rely on and offer capacity, adopt quickly, and gain immediate value through faster sourcing and new revenue.
